

FULL SERVICE PROVIDER TO ORTHOPEDIC COMPANIES

Kapstone Medical offers services to cover the spectrum from an initial product concept all the way to a finished device on the shelf. We are solely focused on medical device development. Our core strengths include product design and development, quality system development and regulatory affairs. We have also carefully selected a small group of trusted partners to assist you with manufacturing and testing.

In 2008 Kapstone began acquiring and developing intellectual property with the sole purpose of enabling our clients to achieve their product development goals even faster. Licensing opportunities are available. Call us to find out more.
